

JAGIELLONIAN UNIVERSITY MEDICAL COLLEGE

Covid-19 Safety Procedures

Activities – academic teachers, students

Every student should feel responsible for the safety of fellow students, teachers, other university staff members and their own.

In view of the existing epidemiological situation students should always respect all principles associated with the existing epidemics

1. Students* attending in-person educational activities

- Educational activities can only be attended by students not presenting any symptoms suggestive of COVID-19 such as, among others, fever, cough muscle and joint pain
- In case of respiratory infection symptoms student should stay at home or temporary residence i.e. dormitory, rented accommodation
- Educational activities cannot be attended by student who shares accommodation with a quarantined person, a person under home-based isolation or if he/she is quarantined or remains under home-based isolation.
- Only students, academic teachers or technical staff can be present in the locations where education activities are carried out.
- Each student uses own, if possible, tools/objects (stethoscope etc.) necessary for effective performance of educational process. The University provides systematic disinfection of the objects shared during the activities (if they are not disposable). It is not recommended to borrow objects, tools or equipment from other students attending the same educational activities.
- During breaks in activities students can leave the location or stay at the premises if there is enough space for keeping social distancing specified by regulations.

2. Principles of individual protection

- While waiting to enter the location of activities students are asked to maintain social distance and cover mouth and nose with a mask
- Mask should be worn when attending all educational activities (disposable or reusable type)
- Protective masks must be worn at the whole area of the premises where activities are carried out. If, for some reason, mouth and nose cover must be taken off, social distance rule must be strictly observed.
- Academic teachers are also required to wear face masks.
- Before entering the room where educational activities are to take place, each student should carefully wash their hands with water and soap and then disinfect them with the sanitizer provided by the University.
- The teacher must, each time, make a list of names of the students attending the activities.

In clinical units the principles of clinical/practical activities are set out by the host unit.

3. The safety rules for student services are set out by respective units.

4. The procedures to be followed in case of fever or other symptoms of infection or suspected infection are described in the Covid-19 Safety Procedures for Students.

* Definition of student – it means an undergraduate, doctoral or postgraduate student.
